

Press Release

COMPRION launches new product – File Tree Express

Paderborn – January, 2007

– **COMPRION presents the File Tree Express – An easy to use software-tool for reading, editing and comparing (U)SIM Card file trees, specially designed for mobile phone test engineers.**

Although the File Tree Express is developed to fully meet up with the field trial demands raised by the GSM Association as well as the GCF Field Trial Group it can also be used by everyone who needs to read, edit and compare 2G/3G (U)SIM cards and R-UIM cards.

Easy installed on the test engineers PC it can be used in lab environment but evolves its full usability in the field test situation.

With its Windows GUI it presents strong features to support the creation of card-specific content, as well as the reuse of stored content, for handset testing.

The software is compliant with COMPRION's IT³ (U)SIM Simulator product family, files can be easily exchanged between the File Tree Express and the COMPRION card simulator products.

This strong use case oriented product bundles a high portability with an "Easy to use" approach and allows customers to read and modify the file content of all SIM, USIM and R-UIM cards with any PC-SC card reader available on the market.

The product is offered only by COMPRION.
